Dr. Kyung-yeol Kim (graduate of the School of Earth Sciences and Environmental Engineering), appointed as a full-time professor at the State University of New York

- GIST (President Seung Hyeon Moon) – Dr. Kyung-yeol Kim, who obtained his Ph.D. from the Environmental Membrane-Biotechnology Laboratory (Professor In S. Kim) of the School of Earth Sciences and Environmental Engineering, has recently been appointed as a tenure-track assistant professor in the Department of Environmental & Sustainable Engineering at University at Albany, State University of New York.
 - After graduating from the Department of Environmental Engineering at Kyungpook National University, Dr. Kyung-yeol Kim entered the School of Earth Sciences and Environmental Engineering in February 2014. He received his Ph.D. in energy recovery and advanced water treatment with an ultrafiltration membrane (UF membrane) for microbial electrochemical devices.
- He has been working as a postdoctoral researcher at Pennsylvania State University for four years and has carried out in-depth research

on microbial electrochemical technology and published a number of outstanding papers.

- Dr. Kyung-yeol Kim said, "I will continue to challenge sustainable technology development through environmental engineering. I hope that more GIST alumni will be able to play an active role not only in Korea but also throughout the world."
