GIST Nobel Grubbs Center for Polymers and Catalysis completes the "2019 GIST Grubbs Center Seminar" at Caltech

- GIST (President Kiseon Kim) Nobel Grubbs Center for Polymers and Catalysis (Director Robert H. Grubbs, Assistant Director Jae-Suk Lee) hosted the "2019 GIST Grubbs Center Seminar at Caltech" on November 11, 2019, at the California Institute of Technology.
 - The GIST Nobel Grubbs Center for Polymers and Catalysis was established in January 2016 to create a leading research environment through joint research collaboration with Professor Grubbs of Caltech, the 2005 Nobel laureate in chemistry, to secure world-class research capabilities and competitive technologies.
- The seminar provided a venue for Professor Jae-Suk Lee and Professor Sukwon Hong to visit Caltech to share their research results with Professor Robert Grubbs and Professor Brian Stoltz.
 - Recently, the research results of Professor Jae-Suk Lee's research team, supported by the Nobel Grubbs Center for Polymers and Catalysis, have been published in *Macromolecules* by the American Chemical Society and in *Polymer Chemistry* by the Royal Society of England, the leading journal in the field of polymers, and the research conducted by Professor Sukwon Hong's research team has been published in the international journal *Organometallics*.

- Professor Jae-Suk Lee and Professor Sukwon Hong said, "We will continue to work closely with Caltech to secure world-class technology. In addition to active human exchanges, we will expand our network and contribute to the further development of the GIST Nobel Center."

2019 GIST Grubbs Center Seminar at Caltech

Church Room 201, Caltech, Pasadena, CA

November 11th, 2019

12:30 pm ~ 2:00 pm

(Lunch will be provided)

Prof. Jae-Suk Lee

Gwangju Institute of Science and Technology (GIST)

“Precise synthesis of bottlebrush block copolymers with ultrahigh molecular weight via living anionic polymerization and ROMP”

Prof. Sukwon Hong

Gwangju Institute of Science and Technology (GIST)

“Imidazo[1,5-a]pyridin-3-ylidene N-Heterocyclic Carbene Ligands”

Grubbs Center for Polymers and Catalysis
