

At **GIST** which has world-class research capabilities

We are looking for talented people who will

leap together towards **World No.1** 

A research institute in Korea with graduate and undergraduate programs where passion and knowledge converge to innovative technical solutions for issues and problems affecting the world; also known as the Gwangju institute of Science and Technology

where ues

**Degree Programs** 

Master of Science Program(M.S.)

Doctor of Philosophy Program(Ph.D.)

Integrated M.S. and Ph.D. Program(M.S./Ph.D.)

## **Academic Schools / Departments**

School of Electrical Engineering and Computer Science	School of Materials Science and Engineering
School of Mechanical Engineering	School of Earth Sciences and Environmental Engineering
School of Life Sciences	Department of Physics and Photon Science
Department of Chemistry	Department of Biomedical Science and Engineering
School of Integrated Technology	School of Energy Convergence
Artificial Intelligence(AI) Graduate School	

Section of Graduate Admissions, Unit 323, GIST College A(N4), 123 Cheomdangwagiro, Bukgu, Gwangju, 61005, Republic of Korea

## **Admission Schedule**

Semester of Entrance	Spring Semester (starting from March)	Fall Semester (starting from September)
Application Deadlines	October 13th(Fri.), 2023	April 15th(Mon.), 2024
Documents Review	30 days	30 days
Notification of Admission Results	December 8th(Fri.), 2023	June 4th(Tue.), 2024
Registration of Admitted Students	Dcember 26th(Tue.), 2023 ~ January 5th(Fri.), 2024	June 25th(Tue.), 2024 ~ July 5th(Fri.), 2024

## Application&Required Documents(Online Upload)

Website	https://service.gist.ac.kr/admission/graduate/foreigner
Mandatory	<ul> <li>Online application</li> <li>Official degree certificates and transcripts(apostille or notarized)</li> <li>Two letters of recommendation</li> <li>→ Recommendation letters will be received electronically from the referees you register on your system.</li> <li>An official English proficiency test score report</li> <li>→ Minimum scores: 80(TOEFL iBT), 550(TOEFL PBT), 6.5(IELTS Academic), 750(TOEIC), 285(NEW TEPS)</li> </ul>
If applicable	<ul> <li>A letter of recommendation from your department chair/dean for the Matriculation Fee waiver</li> <li>A certification of English language proficiency issued from the applicant's last home institution</li> <li>→ For Conditional Admission only</li> </ul>

## **Financial Support**

Tuition Assistance	• Fully supported: 3,415,000 won per semester (One-time matriculation fee of 680,000 won is charged to all newly admitted students to be enrolled)
Monthly Allowance (KRW, per month)	<ul> <li>Student allowance</li> <li>M.S.: 140,000</li> <li>Ph.D.: 295,000</li> <li>Meal allowance: nearly 100,000</li> <li>International student allowance: 120,000</li> </ul>
Research Fellowships (KRW, per year)	• Average as of 2022 M.S.: 6,400,000 Ph.D.: 13,740,000
Housing	<ul> <li>On-campus Dormitory: Double occupancy</li> <li>Apartment for Married Students: Two bedroom apartment</li> </ul>
Health Insurance	<ul><li>60% of the National Insurance fee is supported</li><li>Annual medical checkup</li></ul>
Flight Reimbursement	<ul><li>Reimbursement for a one-way flight to Korea.</li><li>For the first time use only.</li></ul>

## **School of Electrical Engineering and Computer Science**

https://eecs.gist.ac.kr

• For the preparation of a future where the global development of creative and innovative technologies will be of paramount importance, the School of Electrical Engineering and Computer Science focuses on the Education and research in the core areas of devices, systems and software along with eight other interrelated research areas.

#### **Al and Robotics**

· Machine Learning & Vision

#### **IoT and Cyber Security**

· Communication & Information Science · INFONET

#### **Circuits and Systems**

- · Integrated circuits & Systems
- · Analog & Mixed-signal Intergrated Circuit design
- · Semiconductor Device Simulation
- · Integrated Circuit Design

#### **Signal and Information Systems**

- · Audio Intelligence technology
- · Speech & Audio Processing
- · Intelligent Information Systems

#### **Big Data and Cloud Computing**

· Data Science · Data Analytics · Cloud Computing

#### **Energy Systems and Sensors**

· Microwave Sensing & Imaging

#### **Photonics and Nanotechnology**

- · NanoSystems
- · Advanced Nano Electronics & Photonics Technology
- Photon Information ProcessingSolid-Stated Lighting
- Artificially Intelligent Semiconductors
- · MathSymbolica
- · Flexible OptoElectronics
- · Applied Optics

#### **Biomedical Informatics**

- · Data Mining & Computational Biology
- · BioComputing
- · Bioinformatics and Intelligence

## **School of Materials Science and Engineering**

https://mse.gist.ac.kr

 Missions of School of Materials Science and Engineering at GIST are (1) to educate and train talented students as innovative global leaders at the forefront in future materials research, and (2) conduct pioneering, interdisciplinary research in areas of(not limited to) Healthcare, Energy/Green Tech, Connected Mobility(Infortainment), and Artificial Intelligence.

#### Healthcare

- Inorganic materials Flexible electronics/ Electronic skins sensors/ Bioglass
- Organic materials Shape morphic/ Drug delivery hydrogel/ Porous biofunctional materials/ Mixed conductor polymers/ Organic Semiconductors/ Supramolecular theragnostic nanoagent/ Hydrogel/ Conducting polymers ionogels
- **Biomaterials** Therapeutic protein nanobiomaterials for drug delivery/ Ionic hydrogel/ Cryopreservation nanoagent/ Tissue engineering nanobiomaterial/ DNA nanorobotics based theraputics DNA synthesis/ Drug delivery system regenerative medicine/ stem cell therapnosis/ Bio-degradable
- Composite materials Bioink bioelectrode/ Polymer-DNA based microbotics based therapeutics/ Compliant electronics & bio-signal monitoring sensors

## **Energy / Green Tech**

- Inorganic materials Perovskite/ Catalyst exsolution Photo-sensor/ Nanoporous metaloxide heterostructure catalyst/ Hydrogen production materials/ Hydrogen energy related oxides/ Metal halide perovskite/ Solar water splitting: Solar fuel/ Energy storage: Renewable energy materials/ Photocatalysis: Battery anode materials/ Magnetic energy materials: Nano-spintronics/ Harvesting/ Piezo-ferroelectric materials
- Organic materials Organic Solar Cell Small molecule nanostructure/ Carbon capture-conversion materials & catalysts/ Redox-active electrolytes/ Environmental purificaiton polymers/ Flexible organic solar cells/ Flexible organic optoelectronics/ Photodetector/ Photovoltaics
- Biomaterials Biocatalytic carbon Recycling/ recovery of rare earth elements/ Implantable energy storage
- Composite materials Graphene/ Halide perovskite stability/ Nanostructure energy-green chemistry catalysts & catalytic processes/ Next-generation battery materials/ Fuel-cell materials/ Advanced electrolytes-energy storage/ Metal-organic hydrid catalyst/ Metal oxides/ Photodetector-Photovoltaics/ Flexible energy harvesting devices

## **Artificial Intelligence**

- Inorganic materials Neuromorphic device emerging memory/ memristor synapse/ Al-based catalyst development/ Energy materials based on machine learning/ Deep learning-Computational materials design
- Organic materials Al-based organic electronic material development/ 4D printing materials-biomimetic self-assembly
- Biomaterials Computational design of therapeutic protein/ DNA-based data storage
- Composite materials Al-based hybrid catalyst development/ Security system based DNA & light-responsive materials/ Al-powered intelligent soft actuators

#### Connected Mobility (Infortainment)

- Inorganic materials 3D electronics/ CNT/ Semiconductor Sensor Metastructure insulator/ Back end of line(BEOL) Advanced packaging/ Emerging electronic materials/ 2-dimensional materials/ Thin film transistor Gas sensor/ Magnetic materials based proximity sensors
- Organic materials OTFT/ Switching device-Flexible insulator/ Electromagnetic shielding & absorption/ Triboelectronics
- Composite materials 3D electronics/ CNT composite/ Transistor/ Metastructure

## **School of Mechanical Engineering**

Robotics and Mechatronics	Robots, Lidar/Radar Sensors, Material Devices, Precision Machining Robots, Robot and Human
Next-Generation Vehicle Engineering	Autonomous and Intelligent System, Vehicle Dynamics, Optimization, Smart Manufacturing, Sensor/ Actuator, Information Technology, Aerodynamics, and Unmanned Aerial Vehicles
Thermal Fluids and Energy	Thermodynamics, Fluid Mechanics and Heat Transfer, Automotive and Aircraft Engine Cycles and Aerodynamic Design, Fluid Dynamics and Heat Transfer in Micro-Nanoscale, Thermal Phenomena in Lasers and Micromachining
Multi-scale and Multi- physics Engineering	Clean Combustion Technology, Highly Efficient Motor, Integrated Study, Mechanical engineering problems requiring a micro-and multidisciplinary approach
Smart Design and Manufacturing	Scientific Visualization and 3D printing, Laser Micro/Nano Fabrication, Laser Fabrication and Applications, Prognostics and Health Management of Engineered Systems, Computational Modeling and Simulation with Finite Element Methods, Unmanned Automated Production, Ultraprecision Hybrid Manufacturing Technologies, 4D Printing Research, Design and Measurement Technologies for Micro Systems, Micro Sensor and Actuator Tehnology
Machine Intelligence and Informatics	Deep Reinforcement Learning and Control, Smart AR/VR, Object Recognition and Geometric Data Processing, Smart Multi-Modal Data Fusion, Energy Informatics and Big-Data Based Predictive Analysis, Power lot for Smart Energy Management, Statistical Machine Learning for Data Channel in Physical Layer, Compressive Sensing and Smart Detection for Machine Systems, System Health Diagnostics and Prognostics, Distributed Consensus for Multi-Agent Machine Systems.

## **School of Earth Sciences and Environmental Engineering**

https://env1.gist.ac.kr

- The necessity of science and technology to overcome the climate crisis, environmental pollution, and energy and resource depletion caused by growth-oriented industrialization and increases in energy consumption
- Contribution to solving global environmental issues as well as local problems through the development of sustainable energy, and the diagnosis and restoration of air, water and soil pollution
- Educating environmental experts much needed in a carbon-neutral era, developing advanced environmental technology, and leading world-class environmental science and engineering research

# Sustainable Future Environment Created by the School of Earth Sciences and Environmental Engineering GIST

### **Earth and Climate Change**

- · Climate Change
- · Air Pollution
- · (Ultra)Fine Particle Air Water Soil Pollution
- · Marine Resources
- · Restoration of Ecological system
- · Environmental Satellite

#### **Sustainable Energy**

- · Electrochemistry
- · Energy Storage
- · Carbon Dioxide Capture and Storage
- · Catalysis Chemistry

## Water Science & Engineering

- · Water Treatment
- · Seawater Desalination
- · Membrane
- $\cdot$  Hydrospheric Toxicity and Monitoring
- · Recycling Technology of Water and Resources

### **School of Life Sciences**

- Use of innovative research techniques and technological advancement are key to exploring principles that underlie various life
  phenomena. These may provide a strong foundation for the following: next-generation drug development, identification of
  causes of diseases, production and design of useful bio-materials, technology for sustainable conservation of biological and
  environmental resources.
- Going beyond the boundaries of life science academics and implementing a new conceptual framework as a research-oriented university based on convergence studies.

#### Cell/Molecular Biology

- · Cell dynamics imaging and logistics
- · Cell aging and clearance
- · Genomics and epigenomics
- · Tumor metabolism and suppressor
- · Gene therapy and new drug targets
- · Osteoarthritis research

#### **Biochemistry/Biophysics**

- · Protein structure and function
- · Functional and medicinal proteomics
- · Single molecule biology and cellular dynamics
- Membrane protein modulator and drug discovery

### Neuroscience / Developmental Biology

- · Regulation of neural circuitry and IT control
- · Observation of germ cells and gene discovery
- · Brain engineering and neurodevices
- Observation of vascular endothelial cells and vascular markers
- · Molecular neurobiology

## Immunology

- · Immune synapse and cell therapy
- · Regulation of cancer, autoimmune diseases
- · Regulation of inflammatory diseases
- Dynamic interaction of immune system and stem cells
- · Tissue regeneration and disease development

## 0-0-0

## **Department of Physics and Photon Science**

https://physics.gist.ac.kr

- Educating creative scientists the field of physics and photon science
- Conducting In-depth researches in the area of optics, plasma physics, condensed matter physics, and particle physics, etc.

## **Condensed Matter Physics**

- · X-ray studies of nano condensed matter physics
- · Optical spectroscopy for condensed matter physics
- · Surface science using X-rays
- · Computational quantum physics
- Quantum information science and technology

#### **Optics**

- · Ultrafast optics and nonlinear optics
- · High Power Lasers and Their Applications
- · Attosecond science
- · Quantum integrated photonics
- · Relativistic Quantum Photonics

## Particle Physics

- · Field theory and string theory
- · Gauge/ gravity duality
- · Gravitational understanding of strongly correlated system

## Plasma Physics

- · Intense laser and matter/Plasma interactions
- · Particle acceleration and coherent radiations by laserplasmas
- · High energy density physics
- Laser fusion

## **Department of Chemistry**

 We are building a new model for department of chemistry with five focused research areas, Organic, Inorganic, Physical, Biological and Analytical Chemistry.

#### Inorganic Chemistry

- · Synthetic modeling of metalloenzyme active site
- · Organometallic catalyst development
- · Hybrid molecular material catalyst for the solar fuels research
- · Development and Analysis of Surface Chemistry on Two-dimensional Nanomaterials
- Precise synthesis of plasmonics nanostructures and their applications

#### Physical Chemistry

- Photochemistry
- · Time-resolved molecular spectroscopy
- Biophysical chemistry of cells and biomolecules
   Development and application of quantum chemical
   simulation method using Al
- · Computational study on water structure and dynamics

#### Organic Chemistry

- · Synthetic methodology and catalyst development
- · Natural product synthesis
- · Medicinal chemistry and drug discovery
- · Molecular sensors and High-throughput screening
- · Peptides and peptidomimetics

#### Biological Chemistry

- · Protein structure by X-ray crystallography
- · Biosensor and biophotonics for diagnosis, theragnosis and food safety
- Multidimensional NMR spectroscopy for proteinligand interactions

#### Analytical Chemistry

- Surface Analytical Chemistry
- · Nanoscale Material Chemistry
- · Biosensors and Bio-Instruments

## **Department of Biomedical Science and Engineering**

https://bmse.gist.ac.kr

- As a new multidisciplinary research and education program, Department of Biomedical Science and Engineering(BMSE) was established in spring 2008 with the mission of promoting fusion researches in Biomedical Science and Engineering applications.
- All faculty members of BMSE are recognized as world-class researchers in their special areas. The ongoing research topics are in the field of biomedical science and engineering such as optical system design for biomedical applications, neuro signal analysis, neuromodulation, study on sleep and consciousness, peroxisome and lipid metabolism, genomic medicine, and so on. BMSE invites extremely energetic applicants pursuing advanced degrees(M.S.,Ph.D.) in multidisciplinary biomedical science and engineering. Specially, candidates who have Western or Oriental M.D.s as well as engineering or science backgrounds are strongly encouraged to apply. With world-class faculty members and collaborating physicians in affiliated hospitals, we provide BMSE students top-class educational opportunities to become future professor, physician scientist, biomedical researcher or CEO/CTO in medical fields and clinic.

## **Convergence Technology**

#### **Immune & Metabolism**

- · Post-transcriptional Regulation of Immune System
- · Anti-cancer Microbiome
- · Regulation of Metabolic Stress
- Lipid Metabolism Dysfunction Ocular Immune Privilege and Immune Regulation

#### **Biophotonics**

- Neurophotonics
- · Photomedicine
- · New Generation Biophotonic Imaging

#### **Brainscience & Neuroimaging**

- · Neuromodulation
- · Neural Circuit Connectomics
- · AI-based Brain Imaging & Signal Processing

## **School of Integrated Technology**

https://iit.gist.ac.kr

## A Proud Creator of Future Science and Technology

#### **Graduate Program of Culture Technology**

 Application of Computational/Information Technology to various cultural-related fields such as humanities, education, and art entertainment

#### Research Area

- · Media Technology (Computer Graphics, AR/VR)
- · Intelligent Interaction Technology (AI, HCI)
- · Cultural Content Design (Game, Art&History)

#### **Graduate Program of Intelligent Robotics Technology**

- · Specialized in healthcare and medical robots
- · Global technology leadership in rehabilitation and nano-robot fields
- Presenting human-computer interaction and human-centered future environmental solutions that bring in human and artificial intelligence technology
- Artificial intelligence research and development that can be used to a variety of robotic fields(robot vision, manipulation, swarm control, cloud robotics etc)

#### Research Area

- · Al robotic applications
- · Cloud AI platform for Robotics
- · Human-Computer Interaction(HCI+AI Mixed Reality Future Mobility)
- · Medical Robots(Nanorobots, Wearable and Rehabilitation robots)
- · Sim-to-Real(Synthetic Data Generation via Simulator, Domain Adaptation) for robot vision and manipulation
- Al-based Robot Control(Autonomous Navigation, Autonomous Medical Robot Manipulation, Intelligent Human-Robot Interaction)

## **Graduate School of Energy Convergence**

- Fostering versatile students specialized in Improvement of energy system flexibility
- Development of integrative thinking skills based on a multidisciplinary environment
- Training professionals with unique academic capabilities and practical engineering skills

# Educational Objectives

#### Training of versatile students

- · Improvement of energy system flexibility
- · Problem solving ability
- · Practical engineering skills

#### Accelerating growth of new industries

- · Patent/Technology Transfer
- · Fostering startup
- · Networking with enterprises

#### Research

## **Graduate Program of Energy Convergence**

Driving innovation in energy technology through innovative research in renewable energy, eco-friendly hydrogen/electric vehicles, and smart power grids

· Energy Conversion and Storage

- · Energy Informatics
- · Power Electronics, Power System, Power Economics
- · Sustainable Energy (Nano Materials and Energy Environments)

## **Artificial Intelligence(AI) Graduate School**

https://ai.gist.ac.kr

- Creative fusion research leading AI core technology based on X+AI and cultivation of empirical experts
- Providing a test bed environment for substantiating Dreaming Child (AI) including a supercomputer uniquely registered in Top 500 among the domestic educational institutions

## **Educational Object**

**Teaching Yourself** 

Self-Directed, Education by E-Learning, Flipped Learning, PBL Integrated Course 1~3

Recreational Education as TED-Style AI Concert and AI Industrial Field Trip

Recreation

Adaptation

Al Adaptation Education via Top Al Conferences and Lectures by World Class Al Researchers Integrated Course 4~5

Industrial Mindset

Industrial Experience Education by Al Industry Internship and Project Participation New Value

New Value Creation through Multidisciplinary Convergence and Industrialization

#### **Research Area**

#### Generalizable

Flexible and Robust AI for Dynamic Environmental Change

#### Integrated

Learnable, Perceivable, and Inferable Al Integrating InterDomain Big Data

#### Safe/Swift

Safe and Swiftly Inferable AI by Solid AI Infrastructure and Advanced Software Technology

#### Transferable

Integrated and Transferable Al over Interdisciplinary Domain

#### G.I.S.T. Hyperscale & Generative Al AI for X Computer Vision & Multi-modal AI Human-Centric & Responsible Al Natural Language Processing & Explainable AI Al Law & Ethics **Evolutionary & Quantum Computing** ΑI Al for Healthcare Knowledge Representation & Reasoning Al for Mobility & Digital Twin 10 Robotics & Reinforcement Learning Al for Culture & Metaverse Al Infrastructure and Systems
