- 직원 수 : 15명
- 연간 매출액 : \$2.4 Million
- 설립년도 : 2002년

Nano-Ditech Corp specializes in the development and manufacture of high quality rapid immuno-diagnostic products to serve the point-of-care market place including medical professionals, physicians, clinical laboratories and hospitals. We focus on rapid POCT immunoassays for the detection of drugs of abuse, inflammation and cardiac markers in the emergency department. Nano-Ditech's key workforce has extensive experience in the IVD industry and utilizes their experience to satisfy customer needs by ensuring the highest level of product quality.

Nano-Ditech is proud to be among the few that have a track record for successfully developing test devices through the development of raw materials and obtaining US FDA and CE clearance. Nano-Ditech's unique techniques have enabled us to rapidly develop all classes of monoclonal antibodies for each of the illicit drugs and cardiac disease markers to be specifically used for the rapid assay.
